DETAILED ACTION

Drawings

The Replacement Drawings 5a, 5b and 5c were received on 06 September 2007.

These drawings are accepted.

Specification

The amendment to the Specification filed 06 September 2007 are accepted.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gary W. Hamilton on 17 September 2007. The application has been amended as follows:

As to claim 6, starting on line 22, -- the power consumption of the wireless interface device -- is changed to -- the power consumption of the wireless interface unit --. This is required to resolve a lack of antecedent basis concerning the wireless interface unit as opposed to the overall wireless interface device, both clearly described in the Specification and figures.

Allowable Subject Matter

Claims 6 and 9-15 are allowed. The following is an examiner's statement of reasons for allowance: with respect to independent claim 6, the prior art made of record teaches a system for managing power in a wireless interface system but does not teach the combination of elements as recited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
